

SAF User Documentation : System Capability Mapping Viewpoint

| Domain | Aspect | Maturity |
|------------|------------------------|--------------|
| Functional | Traceability & Mapping | released |

Example

| # | △ Name | Applied Stereotype | Documentation | Capability Supporting | Capability Supported BY | Refining System Requirement |
|----|--|------------------------------|---|---|---|-----------------------------|
| 1 | Fire Alert Reporting | SAF_SystemCapability [Class] | This capability demonstrates that the system has the power of [tbd] | Detect and Report Fire | Alert fire(context FFDS Context) Manage Operator warning(context FFDS Context) | |
| 2 | Fire Situation Analysis | SAF_SystemCapability [Class] | This capability demonstrates that the system has the power of [tbd] | Detect and Report Fire | Analyze FF data(context FFDS Context) | |
| 3 | Fire Situation Reporting | SAF_SystemCapability [Class] | This capability demonstrates that the system has the power of [tbd] | Detect and Report Fire | Analyze FF data(context FFDS Context) | |
| 4 | Forest Fire aerial-based Data | SAF_SystemCapability [Class] | This capability demonstrates that the system has the power of [tbd] | Detect and Report Fire | Request sensor data(context FFDS Context) | |
| 5 | Forest Fire terrestrial-based Data Acquisition | SAF_SystemCapability [Class] | This capability demonstrates that the system has the power of [tbd] | Detect and Report Fire | Request sensor data(context FFDS Context) | |
| 6 | Meteo Forecast Data Acquisition | SAF_SystemCapability [Class] | This capability demonstrates that the system has the power of [tbd] | Detect and Report Fire | Acquire metadata(context FFDS Context) | |
| 7 | Research Analysis Data Acquisition | SAF_SystemCapability [Class] | This capability demonstrates that the system has the power of [tbd] | Detect and Report Fire | | |
| 8 | Resource Management | SAF_SystemCapability [Class] | This capability demonstrates that the system has the power of [tbd] | Add a Sensor Node Ping a Sensor Node Remove a Sensor Node | | |
| 9 | Satellite Image Data Acquisition | SAF_SystemCapability [Class] | This capability demonstrates that the system has the power of [tbd] | Detect and Report Fire | Acquire metadata(context FFDS Context) | |
| 10 | Test & Maintenance | SAF_SystemCapability [Class] | This capability demonstrates that the system has the power of [tbd] | Run Observation Test Switch to Maintenance Mode Switch to Test Mode | | |
| 11 | User Management | SAF_SystemCapability [Class] | This capability demonstrates that the system has the power of [tbd] | | | |

Purpose

The System Capability Mapping Viewpoint describes the relationships of System Capabilities. The reasoning for System Capabilities as support for System Use Cases and the contribution of System Processes to Capabilities are described. Furthermore, the mapping of System Capabilities to Operational Capabilities are identified.

Applicability

The System Capability Mapping Viewpoint supports the "Stakeholder Needs and Requirements Definition Process", and "System Requirements Definition Process" activities of the INCOSE SYSTEMS ENGINEERING HANDBOOK 2015 [§4.2 & §4.3] and contributes to the identification of System Functions, and definition of System Requirements.

Stakeholder

Concern

Presentation

A tabular format listing the relationships of System Capabilities to Operational Capabilities, System Use Cases, System Process Activities, and System Requirements.

Profile Model Reference

The following Stereotypes / Model Elements are used in the Viewpoint:

- [SAF_SFV08a_View](#)
- [SAF_StakeholderRequirement](#)
- [SAF_SystemCapability](#)
- [SAF_SystemCapabilityComposition](#)
- [SAF_SystemCapabilityDependency](#)
- [SAF_SystemCapabilityEnabling](#)
- [SAF_SystemCapabilityGeneralization](#)
- [SAF_SystemCapabilitySupport](#)
- [SAF_SystemFunction](#)
- [SAF_SystemFunctionSupport](#)
- [SAF_SystemProcess](#)
- [SAF_SystemProcessEnabling](#)
- [SAF_SystemRequirement](#)
- [SAF_SystemUseCase](#)
