

# Operational Process Traceability Viewpoint

Domain: Operational Aspect: Crossreference and Mapping

## Example

#	Name	Documentation	Refining of Operational Story	Acting Operational Performer	Mapping To Capability
1	 Search and Rescue	The Rochester Hills Fire Department responded to a fire at an eight-unit apartment building in the 3600 block of Galloway Court around 5:39 a.m. on Sunday, August 16th. Residents called 911 after hearing loud thundering and seeing bright lightning. The fire department believes lightning may have struck the building, causing the fire. Fire was spewing from the roof when firefighters arrived. It took crews one hour to control the fire and another hour to extinguish it. One firefighter was hospitalized for exhaustion. There were no other injuries to residents or firefighters. Firefighters rescued a cat from one apartment. Half of the building is now missing a roof. Four apartments had extensive fire, smoke and water damage; the other four had smoke and water damage.			
2	 Search and Rescue Process		 Search and Rescue		
3	 Fire Detection and Notification	Day trippers using a disposable barbecue started devastating forest fire that destroyed 480 acres of protected woodland killing thousands of creatures. More than 150 firefighters of the Rochester Hills Fire Department spent 48 hours battling the blaze which broke out on Monday lunchtime. Fire investigators have found the remains of two disposable barbecues amid the blackened landscape of Rochester Hills Forest.			
4	 Fire Detection and Notification Process		 Fire Detection and Notification		
5	 Activity				
6	 Send Distress Signal			 Person in Danger	
7	 Receive Distress Signal			 Coordination Center	 Distress Signal Monitoring
8	 Monitor Health			 Coordination Center	 Search
9	 Find Victim			 Surveillance Plane	 Search
10	 Recover Victim			 Rescue Helicopter	 Rescue
11	 Provide Medical Assistance			 Rescue Helicopter	 Medical Assistance
12	 Provide Emergency Care			 Hospital	 Medical Assistance
13	 Cook (food) on a Barbecue			 Day Tripper	
14	 Cause Fire Ignition of combustible Materials			 Fire	
15	 Detect and Notify Fire			 Surveillance Center	 Fire Sources early Detection  Fire Event Management  Fire Propagation Modeling
16	 Receive Fire Report			 Coordination Center	

## Purpose

The Operational Process Traceability Viewpoint describes the relationship(s) of Operational Process(es). The reasoning for Operational Process(es) from Operational Story(s) and their contribution to Capability(s) is described. The assignment of Operational Process(es) to Operational Performer(s) is captured.

## Applicability

The Operational Process Traceability Viewpoint supports the "Business or Mission Analysis Process" activities of the INCOSE SYSTEMS ENGINEERING HANDBOOK 2015 [§ 4.1] and contributes to the definition of operational scenario(s). Note:

## Stakeholder

- Acquirer
- Customer
- Supplier
- System Architect

## Concern

---

- Show in a concise manner the relationships from Operational Process to Operational Story and to Operational Performer.

## Presentation

---

The relationship(s) of Operational Process Activity(s) to Operational Story(s) and to Operational Performer(s) are represented in a table format.
