

# Operational Context Exchange Viewpoint

Domain: Operational Aspect: Context

## Example

## Purpose

The Operational Context Exchange Viewpoint defines connectivity and exchange between Operational Performer(s).

## Applicability

The Operational Context Exchange Viewpoint supports the "Business or Mission Analysis Process" activities of the INCOSE SYSTEMS ENGINEERING HANDBOOK 2015 [§ 4.1] and contributes to the problem or opportunity statement. Note:

## Stakeholder

- 
- [Acquirer](#)
  - [Customer](#)
  - [Supplier](#)
  - [System Architect](#)

## Concern

---

- What Operational Exchange the Operational Performers need to consume or provide?

## Presentation

---

An internal block diagram (IBD) associated to an Operational Context showing the connected Operational Performer(s) in their respective Operational Role and the Operational Exchange per connection.
