

Logical Function Assignment Viewpoint

Domain	Aspect	Maturity
Logical	Mapping & Crossreference	under construction 

Example

Purpose

The Logical Function Assignment Viewpoint specifies the assignment of System Functions to the Logical SOI Elements.

Applicability

The Logical Function Allocation Viewpoint supports the "System Architecture Definition process" activities of the INCOSE SYSTEMS ENGINEERING HANDBOOK 2015 .

Stakeholder

- [Hardware Developer](#)
- [Software Developer](#)
- [System Architect](#)

Concern

- Which functions/functional requirements are assigned to a logical item?

Presentation

A Logical Function Assignment Matrix featuring

- the call behavior action representing usage of System Functions
- the part property(s) representing usage of Logical SOI Elements
- the allocation relationship between abovementioned elements
