| #  | Name  | Applied Stereotype   | Documentation   | Process Refining  | Process Performed BY  | Process Enabling  |
|----|---|--|---|---|---|---|
| 1  |  Search and Rescue                |  SAF_OperationalStory [UseCase]<br><<...>> TODO_Owner [Element]   | This Story sets the context of the Air & Land rescue by illustrating the search and rescue operation at land involving a cat in distress. The Rochester Hills Fire Department responded to a fire at an eight-unit apartment building in the 3600 block of Galloway Court around 5:39 a.m. on Sunday, August 16th. Residents called 911 after hearing loud thundering and seeing bright lightning. The fire department believes lightning may have struck the building, causing the fire. Fire was spewing from the roof when ... |   |   |   |

| 11 |  Fire Detection and Notification |  SAF_OperationalStory [UseCase]<br><<...>> TODO_Owner [Element] | Day trippers using a disposable barbecue started devastating forest fire that destroyed 480 acres of protected woodland killing thousands of creatures. More than 150 firefighters of the Rochester Hills Fire Department spent 48 hours battling the blaze which broke out on Monday lunchtime. Fire investigators have found the remains of two disposable barbecues amid the blackened landscape of Rochester Hills Forest.  |   |   |   |

### Purpose

The Operational Process Mapping Viewpoint describes the relationships of Operational Processes. The reasoning for Operational Processes from Operational Stories and their contribution to Capabilities is described. The assignment of Operational Processes to Operational Performers is captured.

### Applicability

The Operational Process Mapping Viewpoint supports the "Business or Mission Analysis Process" activities of the INCOSE SYSTEMS ENGINEERING HANDBOOK 2015 [§ 4.1] and contributes to the definition of operational scenarios.

## Presentation

---

A tabular format listing the relationships of Operational Process Activities to Operational Capabilities, Operational Stories, and Operational Performers.

## Stakeholder

---

- [Acquirer](#)
- [Customer](#)
- [Portfolio Manager](#)
- [System Architect](#)

## Concern

---

- [Show in a concise manner the relationships from operational process to operational story and to operational performer.](#)

## Profile Model Reference

---

The following Stereotypes / Model Elements are used in the Viewpoint:

- [SAF\\_OperationalCapability](#)
- [SAF\\_OperationalPerformer](#)
- [SAF\\_OperationalProcessEnabling](#)
- [SAF\\_OperationalProcessRefinement](#)
- [SAF\\_OperationalProcess](#)
- [SAF\\_OperationalStory](#)
- [SAF\\_SOV08b\\_View](#)

## Input from other Viewpoints

---

### Required Viewpoints

- [Operational Process Viewpoint](#)

### Recommended Viewpoints

- [Operational Context Definition Viewpoint](#)
- [Operational Domain Item Kind Viewpoint](#)
