

Operational Context Exchange Viewpoint

Domain: Operational Aspect: Context

Example

Purpose

The Operational Context Exchange Viewpoint defines connectivity and exchange between Operational Performer(s).

Applicability

The Operational Context Exchange Viewpoint supports the "Business or Mission Analysis Process" activities of the INCOSE SYSTEMS ENGINEERING HANDBOOK 2015 [§ 4.1] and contributes to the problem or opportunity statement. Note:

Stakeholder

-
- [Acquirer](#)
 - [Customer](#)
 - [Supplier](#)
 - [System Architect](#)

Concern

- What Operational Exchange the Operational Performers need to consume or provide?

Presentation

An internal block diagram (IBD) associated to an Operational Context showing the connected Operational Performer(s) in their respective Operational Role and the Operational Exchange per connection.
