

SAF User Documentation : D2_VPTO Framework

Viewpoint Overview Viewpoint

Domain	Aspect	Maturity
SAF Development	Taxonomy & Structure	 proposed

Example

none

Purpose

The Framework Viewpoint Overview Viewpoint provides an overview about the Viewpoints in SAF from a SAF Developers perspective. It shall specify

- the viewpoints available
- their location in the grid by domain and aspect
- their maturity of development

The viewpoint is intended to be used for development or extension of the SAF.

Applicability

The Viewpoint supports the "Specification of an architecture description framework" as defined in ISO42010:2022

Presentation

A content diagram featuring a graphical grid representation containing graphical representations of the aspects, domains, and viewpoints available in the framework.

A table featuring the frameworks viewpoints, the domains, aspects, viewpoint implementation diagrams and maturity.

Stakeholder

- [SAF Developer](#)

- [SAF MBSE approach planer](#)
- [SAF System model user](#)

Concern

- [What is the maturity state of viewpoints in the framework?](#)
- [Where is a viewpoint of the framework located in the frameworks grid?](#)
- [Which columns and rows does the frameworks grid have?](#)
- [Which viewpoints are available in the framework](#)

Profile Model Reference

The following Stereotypes / Model Elements are used in the Viewpoint:
