

## Operational Process Viewpoint

---

| Domain      | Aspect             | Maturity  |
|-------------|--------------------|---|
| Operational | Process & Behavior | <br>released |

## Example

---

## Purpose

The Operational Process Viewpoint describes the Operational Process Activities related to a specific Operational Story, the sequence of execution and/or their operational exchange. The assignment of Operational Process Activities to Operational Performers is captured.

## Applicability

The Operational Process Viewpoint supports the "Business or Mission Analysis Process" and the "Stakeholder Needs and Requirements Definition Process" activities of the INCOSE SYSTEMS ENGINEERING HANDBOOK 2015 [§ 4.1, § 4.2] and contributes to the definition of operational scenario(s).

## Stakeholder

---

## Concern

---

- What operational process activities shall be executed during the execution of an operational story?
- Which operational activity shall be executed by which operational performer in the operational story?

## Presentation

---

The Operational Process related to an Operational Story is represented in an activity diagram showing the ordered execution of Operational Process Activities. Operational Process Activities may be linked in terms of control flow and/or data flow visualizing Operational Exchange needed. Note: Operational Process Activities are assigned to Operational Roles and therefore in a more general manner to the Operational Performers.
