

# SAF User Documentation : System Capability Mapping Viewpoint

Domain	Aspect	Maturity
Functional	Traceability & Mapping	 released

## Example

 System-Capability-Mapping-Viewpoint-example.svg

## Purpose

The System Capability Mapping Viewpoint describes the relationships of System Capabilities. The reasoning for System Capabilities as support for System Use Cases and the contribution of System Processes to Capabilities are described. Furthermore, the mapping of System Capabilities to Operational Capabilities are identified.

## Applicability

The System Capability Mapping Viewpoint supports the "Stakeholder Needs and Requirements Definition Process", and "System Requirements Definition Process" activities of the INCOSE SYSTEMS ENGINEERING HANDBOOK 2015 [§4.2 & §4.3] and contributes to the identification of System Functions, and definition of System Requirements.

## Presentation

A tabular format listing the relationships of System Capabilities to Operational Capabilities, System Use Cases, System Process Activities, and System Requirements.

## Stakeholder

## Concern

## Profile Model Reference

The following Stereotypes / Model Elements are used in the Viewpoint:

- [SAF\\_SFV08a\\_View](#)
- [SAF\\_StakeholderRequirement](#)
- [SAF\\_SystemCapability](#)
- [SAF\\_SystemCapabilityComposition](#)
- [SAF\\_SystemCapabilityDependency](#)
- [SAF\\_SystemCapabilityEnabling](#)
- [SAF\\_SystemCapabilityGeneralization](#)
- [SAF\\_SystemCapabilitySupport](#)
- [SAF\\_SystemFunction](#)
- [SAF\\_SystemFunctionSupport](#)
- [SAF\\_SystemProcess](#)
- [SAF\\_SystemProcessEnabling](#)
- [SAF\\_SystemRequirement](#)
- [SAF\\_SystemUseCase](#)
