

# SAF User Documentation : Operational Process Traceability Viewpoint

Domain	Aspect	Maturity
Operational	Mapping & Crossreference	 released

## Example

#	Name	Documentation	Capability Supporting	Contributing TO Capability	Capability Exhibited BY
1	Safeguard People & Protect Property and Resources	The Disaster Recovery Reform Act of 2018 (DRRA) - enacted after the devastation of the 2017 hurricane season and 2018 California wildfires - emphasizes the importance of capabilities-based planning. Specifically, DRRA requires Federal Emergency Management Agency (FEMA.gov) to "complete a national preparedness assessment of capability gaps at each level based on tiered, capability-specific performance objectives to enable prioritization of grant funding."			
2	SAR Capability				
3	Distress Signal Monitoring	<i>This operational capability demonstrates that the enterprise has the power of observing or recording an activity or performance of people who are in danger or lost.</i>	Search and Rescue	Receive Distress Signal	Coordination Center
4	Search	<i>This operational capability demonstrates that the enterprise has the power of looking for people who are in danger or lost.</i>	Search and Rescue	Find Victim	Fire Truck
5	Rescue	<i>This operational capability demonstrates that the enterprise has the power of salvaging people who are in danger or lost.</i>	Search and Rescue	Recover Victim	Fire Truck
6	Medical Assistance	<i>This operational capability demonstrates that the enterprise has the power of getting the right equipment and medicine to the right people.</i>	Search and Rescue	Provide Emergency Care	Fire Truck
7	FDN Capability				
8	Fire Sources early Detection	<i>This operational capability demonstrates that the enterprise has the power of managing an effective surveillance network which allows to reduce the time between the ignition and the detection of the forest fire.</i>	Fire Detection and Notification	Detect and Notify Fire	Surveillance Center
9	Fire Event Management	<i>This operational capability demonstrates that the enterprise has the power of supporting tasks and time-critical decision processes in forest fire fighting situations.</i>	Fire Detection and Notification	Detect and Notify Fire	Surveillance Center
10	Fire Propagation Modeling	<i>This operational capability demonstrates that the enterprise has the power of providing forest fire danger forecast for the coming hours.</i>	Fire Detection and Notification	Detect and Notify Fire	Surveillance Center

## Purpose

The Operational Process Traceability Viewpoint describes the relationships of Operational Processes. The reasoning for Operational Processes from Operational Stories and their contribution to Capabilities is described. The assignment of Operational Processes to Operational Performers is captured.

## Applicability

The Operational Process Traceability Viewpoint supports the "Business or Mission Analysis Process" activities of the INCOSE SYSTEMS ENGINEERING HANDBOOK 2015 [§ 4.1] and contributes to the definition of operational scenarios.

## Stakeholder

## Concern

- 
- Show in a concise manner the relationships from operational process to operational story and to operational performer.

## Presentation

---

The relationships of Operational Process Activities to Operational Stories, and to Operational Performers are represented in a table.
