

# **Operational Performer Viewpoint**

Domain: Operational Aspect: Structure

## **Example**

## **Purpose**

The Operational Performer Viewpoint represents the taxonomy of the identified Operational Performer(s), if existing and relevant for the understanding of the operation of the intended solution.

## **Applicability**

The Operational Performer Viewpoint supports the "Business or Mission Analysis Process" activities of the INCOSE SYSTEMS ENGINEERING HANDBOOK 2015 [§ 4.1] and contributes to the problem or opportunity statement.

## Stakeholder

- Acquirer
- Customer
- System Architect

#### Concern

- What are the relationships between the partys involved in the operation of the intended solution?
- What partys of the organization, enterprise, or operational entity are needed to achieve an intended operational capability?
- Which Operational Performer will operate or run the system?

#### **Presentation**

A block definition diagram (BDD) depicts Operational Performer(s) and their relation(s) in terms of decomposition or generalization at a level of detail required for the understanding and analysis. Note: Identified Stakeholders are related to Operational Performer(s) if appropriate.
