SAF User Documentation : Operational Context Definition Viewpoint

Domain	Aspect	Maturity
Operational	Context & Exchange	✅ released

Example

Operational-Context-Definition-Viewpoint-example.svg

Purpose

The Operational Context Definition Viewpoint provides the Operational Contexts, and the involved Operational Performers necessary to support a specific set of Operational Capabilities.

Applicability

The Operational Context Definition Viewpoint supports the "Business or Mission Analysis Process" activities of the INCOSE SYSTEMS ENGINEERING HANDBOOK 2015 [§ 4.1] and contributes to both the problem or opportunity statement and the Major Stakeholder Identification.

Presentation

A block definition diagram (BDD) featuring the identified Operational Performers playing a role in the Operational Context being addressed.

Stakeholder

- Acquirer
- Customer
- System Architect

Concern

- What Performers or Resources are necessary to operate the intended solution?

- What is the operational context to achieve an operational story?

Profile Model Reference

The following Stereotypes / Model Elements are used in the Viewpoint:

- Association [UML_Standard_Profile]
- SAF_OperationalContext
- SAF_OperationalPerformer
- SAF_OperationalRole
- SAF_SOV01b_View
