SAF User Documentation : Operational Story Viewpoint

Domain	Aspect	Maturity
Operational	Context & Exchange	✅ released

Example
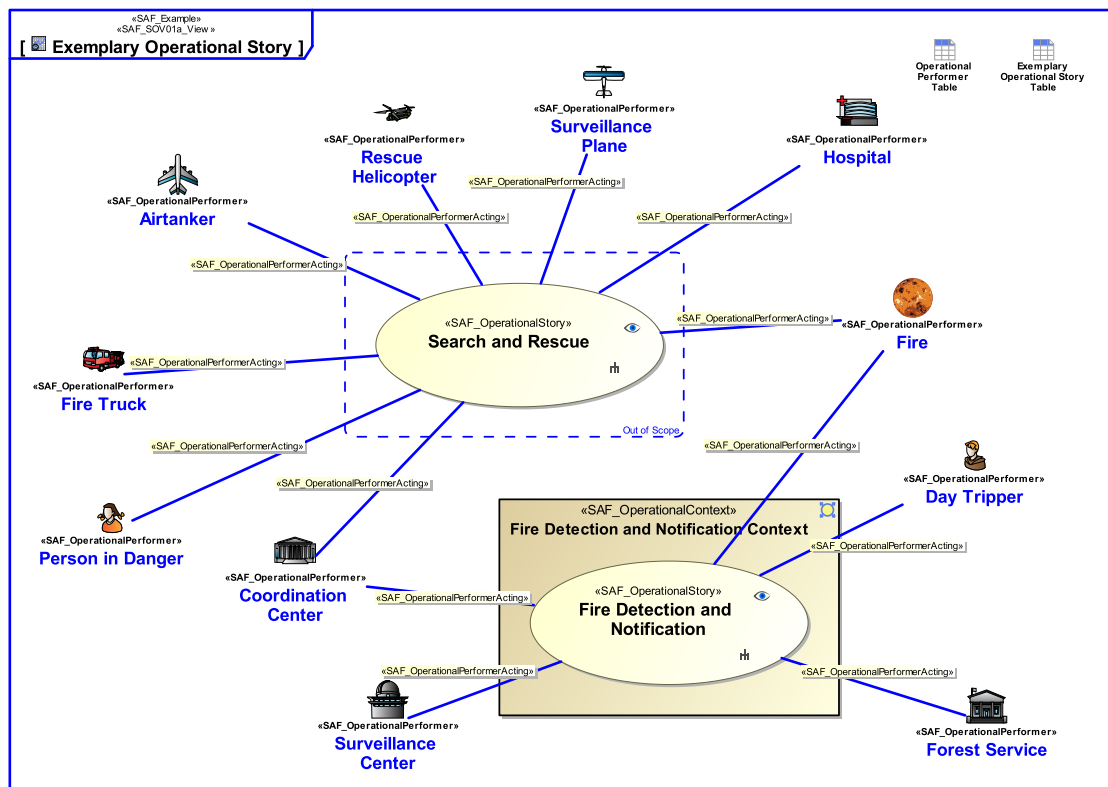

Purpose

The Operational Story Viewpoint

- captures Operational Stories and their relation to Operational Performers, thus enables storytelling
- illustrates the operational background from the Stakeholder's perspective
- serves as starting point to identify Stakeholders and/or context elements

- fosters the communication among different Stakeholders

Applicability

The Operational Story Viewpoint supports the "Business or Mission Analysis Process" activities of the INCOSE SYSTEMS ENGINEERING HANDBOOK 2015 [§ 4.1] and contributes to the problem or opportunity statement.

Stakeholder

Concern

- What are the operational scenarios(Operational Stories) relevant to the system?
- Which is the operational scenario, i.e., course of action, for the mission and the context in which the system of systems solution will exist?

Presentation

A use case diagram depicting model elements representing Operational Stories, and Operational Performers involved in the mission shall be used. In addition, an illustration (drawing, sketch, etc.), and/or a description in free text may provide a comprehensive understanding of the operational background.
